I think if I'm a employer, the most important things is establish good communications with employees. Some may think they will encourage a work-life balance, but you need to know, good communication is the basic of your relationship with employee.

At first, you can know the difficulties which your employees have, so that you can solve it easier. And when you solve the difficulties, the employees will be satisfied. It has giant difference which worker work with happy or depressed. So if you can ~~ge~~ make good communication with employees, they will make more benefit for you.

And then, if you can ~~als~~ always keep communication with your employees, they will trust you and follow you lead. It is a bad condition for one firm, that the employees don't know who are leading

them, and what should they do. It even can let one firm go into liquidation.

At last, ~~can~~ communications can make employees feel the sense of belonging. If your employees think of there as his second home, then you will know how big benefits they can make for you. Doing so will bring the company together, and you can even become friends.

Continue to establish good communications, it will help you a lot in ~~for~~ the future. If you didn't do this before, don't be afraid, it's not too late now.
