Unit 7 Quiz

3. No airplanes will fly If ash covers the sky. ✓

4

4. Lava will make steam If it reaches the sea. ✓

4 Read. Circle True or False.

Mount Etna

There are active volcanoes all over the world. People often live near these volcanoes. Because of the ash, the land is good for farming.

The longest erupting volcano is Mount Etna, in Sicily. It has been active for 3,500 years. Mount Etna erupts very often. It has destroyed many towns. People have tried to change the lava flow. They've built earth walls and used explosives. Some towns have avoided destruction. Successful evacuation plans have kept people safe.

Example: There are active volcanoes all over the world.

1. Mount Etna is in Hawaii.
2. Mount Etna has been active for 3,500 years.
3. Some people have built walls around their towns.
